

# Cellular Printing

Print colourful repeating patterns that look like the layers of cells lining our lungs.

## Top tip!

Try making different cup stamps for different colours and let your child mix colours on the paper by printing one over the other. You could use your cellular stamps to make beautiful wrapping paper for packaging a gift.

## You will need:

Paper cup

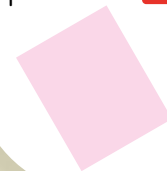

Bubble wrap

Elastic band

Poster paint

Paper

## How to:

Cut a piece of bubble wrap larger than the top of your cup.

Put the bubble wrap over the end of your cup and secure it tightly with a elastic band.

Spread a large piece of paper onto the table and pour different colours of paint into flat containers (such as paper plates or the lids of plastic tubs).
