

“I am the project manager for Breathing Together. My main role consists of day-to-day management of the study ensuring that the study is completed on time and within budget. That being said, I also step in where needed so this might mean that sometimes I’m in the lab working with cell cultures or I might be in the clinic helping out with a follow-up visit with participants and their families. I have really enjoyed getting to interact with some of the families on the study! It’s very different (and refreshing) from my previous years being stationed at the laboratory bench. I’m also the main person behind the social media channels (which I am kind of new to using) so be sure to log on and let us hear from you!”
